

Automation Exercise E-Commerce Automation Framework

Project Overview

This project is an End-to-End Automation Testing Framework developed for the Automation Exercise E-Commerce website using Playwright and JavaScript. The framework automates major workflows such as authentication, product handling, search & filters, cart management, checkout & payment validation, session persistence, API testing.

Website: <https://automationexercise.com/>

Technologies Used

- Playwright
- JavaScript
- Node.js
- Visual Studio Code
- HTML Reports
- Allure Reports
- GitHub Actions
- Page Object Model (POM)
- API Testing
- Cross Browser Testing

Services Covered

1. Authentication Service
2. Product Service
3. Search & Filter Service
4. Cart Service
5. Checkout & Payment Service
6. Shipping Order
7. Persistence & Session Management
8. API Testing

Main Features

- 120+ Automated Test Cases
- Cross Browser Execution
- Session Persistence Testing
- API Automation

- HTML & Allure Reporting
- Reusable Page Object Model

Modules & Test Coverage

Authentication

Product

Search & Filter

Cart

Checkout & Payment

User Profile

Persistence & Session

API Testing
