

Parabank Banking Automation Framework

Project Overview

This project is an End-to-End Automation Testing Framework developed for the Parabank Banking website using Playwright and JavaScript. The framework automates major banking workflows such as login authentication, account overview, fund transfer, bill payment, loan requests, transaction validation, API testing, session persistence, and reporting.

Technologies Used

- Playwright
- JavaScript
- Node.js
- HTML Reports
- Allure Reports
- GitHub Actions
- API Testing
- Cross Browser Testing

Services Covered in Project

1. Authentication Service
2. Registration Service
3. Account Overview Service
4. Fund Transfer Service
5. Bill Payment Service
6. Loan Request Service
7. Persistence & Session Management
8. API Testing

Main Features

- 120+ Automated Test Cases
- Cross Browser Execution
- Screenshot Capture on Failure
- Session Persistence Testing
- API Automation
- HTML Reporting
- Allure Reporting
